

Trade up to the FLIR Si2 and receive a **15% discount**

Ready to elevate your maintenance game? Trade in your old acoustic camera for the most advanced solution on the market – the FLIR Si2!

Why trade-in for the FLIR Si2?

Next-Level PD Performance:

- Detects partial discharges 30 times smaller than ever before and identifies up to 50% more critical issues
- Scans large areas from up to 200 meters away with unmatched accuracy

Leak Detection Redefined:

- Quantifies pressurized gases for substantial savings
- Identifies mechanical faults in conveyor systems to enable proactive measures

Predictive Maintenance Simplified

- Combine Thermal and Acoustic analysis and reporting for a comprehensive approach to your predictive maintenance.

Smart and User-Friendly:

- Provides real-time on-device decision support
- Equipped with AI-driven functionalities for quick, seamless audits
- Safe and easy to operate using only one hand

FLIR Si2 Acoustic Imaging Camera

How to Trade-In?

It's Simple: Return your old acoustic camera to FLIR and upgrade to the FLIR Si2-PD, LD or Pro with a **15% discount off the MSRP**. Trading in your camera is extremely simple — just send in any acoustic camera model with a minimum of 64 microphones. All devices are subject to FLIR's approval.
